Skills Summary

- Languages: JavaScript, HTML, CSS.
- Frameworks: Familiarity with React & NodeJS.
- Databases: MySQL, Firebase
- Platforms: Visual Studio Code, Windows, MS Office.

Internship

Mira Advance Engineering
Web Developer

Thane, India
June 2023 – July 2023

Project Name: Employee Management System
Environment: React, NodeJS.

- Developed a dynamic web-based system to manage employee records, roles, and departments using JavaScript and HTML/CSS.
- Implemented CRUD operations to add, view, update, and drop employee data with real-time UI updates.
- Integrated search and filter functionalities to enhance user experience and data accessibility.
- Focused on modular code structure and responsive design for cross-device compatibility.

Projects

Project Name: Hotel Management System
Environment: React, NodeJS.

- Designed a hotel booking and management system that manages customer details, room assignments, and billing operations.
- Built user interfaces for admin and customer roles using JavaScript and Bootstrap.
- Implemented form validations and interactive dashboards for seamless management.
- Emphasized data organization and UI responsiveness for efficient hotel operations.

Project Name: Google Classroom Clone
Environment: React, NodeJS.

- Created a functional clone of Google Classroom with features like class creation, assignment uploads, and announcements.
- Developed frontend using JavaScript, HTML/CSS, and optionally used Firebase/Node.js.
- Enabled role-based access for teachers and students with intuitive class interaction workflows.
- Simulated core classroom features to show knowledge of user authentication and real-time updates.
